Product Information

Date: *September 21st, 2017*

Product: ACM12 V4.62.006 Access control module

Subject: New firmware V4.62 Released.

Downloads: To go to the ACM12 firmware download page, click here
requires user login and password to download

Improvements:

- Possibility existed that a card reader could generate a "fail to communicate" event, this has now been corrected.

- After a complete power cycle, possibility existed that the ACM12 could be reset to its default values, this has now been corrected.

- An issue existed that if you had a low battery or AC fail indication on the ACM12 and you chose to disable the AC monitoring feature, this was not possible, the notification would not clear. This has now been corrected. AC monitoring feature section [001] Option (3) is now fully functional its default setting is enabled.
